

DOKUMACI

SOUND OF AFRICA

SOUND OF AFRICA

Bring the cultural richness and mystical spirit of Africa into your home with the **Sound of Africa** Collection...

Persan's new collection from the Dokumacı brand, Sound of Africa, is a versatile and sophisticated collection designed with inspiration from Africa's rich cultural heritage. In this unique collection, Persan reinterprets African tribal patterns through its textile language, offering exclusive options for modern interiors.

One of the key fabrics in the collection, Ukara, stands out with its fluid rope pattern, while Sound of Africa, sharing its name with the collection, makes a bold statement with its primitive triangle motifs. Alongside the strong geometric designs, the freehand linear motifs create a balanced contrast in perfect harmony. The high-pile, dimensional velvets bring warmth and depth, while the subtle shimmer of metallic threads in the small patterned surfaces add an aesthetic unity to the collection.

The plain velvet, distinguished by its wool composition, is one of the special pieces completing the collection. Inspired by traditional African textiles, the curtains and sheers gracefully accompany the magnificent upholstery, while the borders enriched with boucle yarns and hand-finished craftsmanship offer inspiration for personalized interiors.

The colors of the collection, dominated by natural elements, reflect shades of African nature. Earth and desert sand tones, the combination of ecru and black, burnt terracotta and cocoa, dusty pink and fir green, along with nude tones, stand out as key colors in the collection.

With its rich textures, the Sound of Africa Collection offers a variety that can appeal to every taste. We invite you to visit Persan stores to explore the collection up close and experience the mystical atmosphere of Africa by touching the fabrics.
